

PATENT  
Docket 24Nordam2

In the Specification

Please substitute the following paragraphs for the corresponding paragraphs being amended:

[0050] The forward flap 58 illustrated in the stowed position in Figure 2 is pivotally mounted in the compartment 50 radially below or inboard of the forward louver 54 with substantially equal axial length, and is disposed flush with the inner skin and adjacent the aft louver 56 and flap 60. Correspondingly, the aft louver 56 is disposed inboard of the aft fairing 62 with generally equal axial length, with the aft flap 60 extending aft therefrom.

[0063] The two ~~lower~~ louvers 54,56 when deployed function to reverse the direction of the fan exhaust in the bypass duct 46. The aft flap 60 is sized to block aft flow of the fan bypass air 32 through the fan nozzle 48, and instead deflect the bypass air radially outwardly through the flow tunnel 52.
